IČ: 466 788 32

declares that the **vermiculite** is a mineral that is found in nature and is not obtained, or mined by chemical means.

**Expanded / exfoliated vermiculite** is the product of thermal treatment of raw vermiculite. There is not used any chemical substances and processes during expansion / exfoliation.

From the above, it can be stated that the vermiculite is in accordance with Regulation European Parliament and Council Regulation (EC) No. 1907/2006 on the registration, evaluation, authorization and restriction of chemical substances, as amended by Commission Regulation (EC) No. 987/2008 and Commission Regulation (EU) No. 453/2010 exempted from the obligation to register in accordance with article 2(7)(b). Safety Data Sheet is not required.

We further claim that vermiculite does not contain asbestos, which is regularly tested in the input control of the material.
